TEAM BUILDING

EVERYTHING A **SUCCESSFUL** TEAM NEEDS

BLINDFOLD CAKE COLLABORATION

This is an interactive event where delegates are divided into teams. Teams are required to design a culinary master-piece that will be judged according to a list of criteria that are directed at the start of the challenge. Each Team is given identical ingredients and tools for the job.

There is an incredible amount of trust that comes into play in the final stages of the activity as the execution is largely dependent on accurate transfer of information and direction from team members. This activity pushes boundaries, requires planning and everyone to work a team as well as collaborative skills involving the opposing team. Each Group needs to present the finished cake to the Head Facilitator where judging will take place. **LET THEM EAT CAKE!**
